ASTANA IT UNIVERSITY

BEYOND THE RIGHT ANSWER

How a pedagogy course changed what we count as learning

AMINA TUZELOVA · ALIKHAN KHAMIDULLA · TEMIRLAN ZHOLTAEV · ALUA NURLYBEKOVA · ZHANERKE PERNESH

FINAL EXAM · GROUP POSTER

Pedagogy of Higher Education

AAI-2606M · Peter Shon

A PROPOSED LEARNING PATH

Editorial synthesis of the essay and notes · not a measured progression

Correct answer › Explanation › Questioning › Feedback › Revision › Defensible judgement

1 INTRODUCTION

OUR RESEARCH QUESTION

Can universities assess independent judgement while keeping clear outcomes and fair standards?

HOW THE COURSE SHIFTED OUR FOCUS

Week 3 essays examined Kazakhstan's reforms and institutional indicators. Later reflections asked what teaching and assessment actually make visible.

THE CENTRAL DILEMMA

STRUCTURE	AGENCY
clarity · fairness	questions · judgement

Our conclusion is a conditional balance, not a choice of one extreme.

2 READING & LITERATURE

WHAT THE READING CHANGED

DIDAKTIK · 2022
Teaching depends on a teacher–student–subject relationship; learning is not fully controllable.

ALIGNMENT · BIGGS 1996
Shared outcomes can create fairness, but must leave space for unexpected questions.

PURPOSE · BIESTA 2009
Qualification matters; socialisation and subjectification also shape education.

FEEDBACK · NICOL 2006
Comments matter when students can interpret, act and self-regulate.

AI & VALIDITY · FISCHER 2024
Our assessment implication: a polished output is insufficient evidence of reasoning.

3 REFLECTIVE NOTES

FIVE DISTINCT, SOURCE-TRACED VOICES

AMINA
From degree-as-product concerns to emancipatory teaching, ethical AI questions and self-active learners.

Typed W1/W6 · scan pp.1–8

ALIKHAN
From public good and discussion to question-led learning and teachers' wider ethical responsibilities.

Typed W1/W6 · scan p.1

TEMIRLAN
Reassessed the "strict teacher" story after noticing exam-preparation bias; plans to speak before ideas feel perfect.

W1 · W5 · W6

ALUA
Shifted from institutional history toward feedback, assessment functions and authentic AI-era evidence.

W1 · W6

ZHANERKE
One note (not a time series): guidance versus dependence, intellectual equality and listening to hesitant students.

Emancipatory-teaching note

4 PEER FEEDBACK

FEEDBACK EVIDENCE PENDING VERIFICATION

The notes mention classroom dialogue, but the supplied packet contains no attributable received peer comment or documented revision in response.

EDITABLE EVIDENCE REGISTER

01 ACTUAL COMMENT
[Peer, date, exact feedback]

02 OUR RESPONSE
[How we interpreted / debated it]

03 DOCUMENTED REVISION
[What changed · before / after]

A future feedback cycle must record a response and revision, not just a comment. (Nicol & Macfarlane-Dick, 2006)

5 POSTER DEVELOPMENT

DESIGN CHOICES IN THIS DRAFT

AUDIT	20 archival files ≠ 20 notes
DISTIL	Seven final-exam sections, not Appendix -5
VISUALISE	Only essay-reported survey figures
DISCLOSE	Leave unverified feedback blank

WHAT IS PLANNED, NOT YET OBSERVED

Five contributors will confirm ownership, rehearse the explanation, log actual peer feedback, then evaluate what presentation taught them.

6 LEARNING THROUGH ASSESSMENT

STUDENT PERCEPTIONS · AAI MASTER'S COHORT · N = 22

Agreement (items 2, 5, 9, 10). 10-item Likert survey; descriptive self-report only.

Diagnostic: find starting points · Formative: use feedback to revise · Summative: judge achievement

Proposed: question → evidence → draft → revision → brief defence, with AI use disclosed.

7 CRITICAL REFLECTION

WHAT WE CAN NOW DEFEND

Good teaching needs clear criteria AND room for students to question, revise and justify.

01 ALIGN FOR JUDGEMENT
Assess reasons and evidence, not identical conclusions.

02 MAKE PARTICIPATION FAIR
Think–write–discuss; do not equate speed with depth.

03 REWARD VISIBLE REVISION
Use low-stakes drafts, targeted feedback and AI disclosure.

OPEN QUESTIONS · workload, oral anxiety, consistency and missing peer-feedback record. Next: pilot these practices and test them.
